

• Add opencv dll files (once)

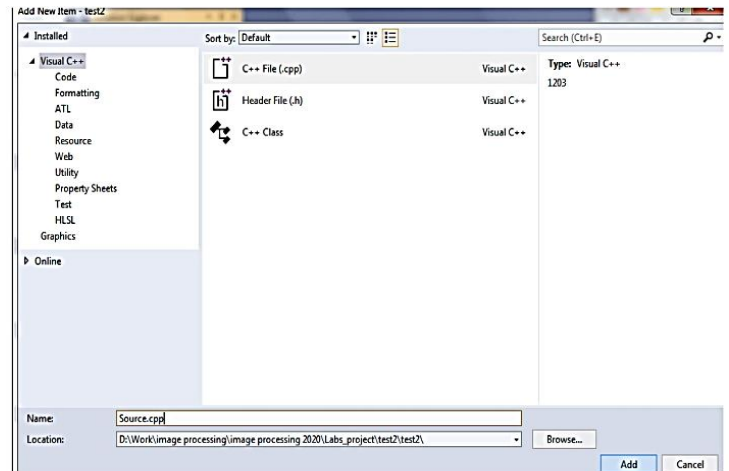

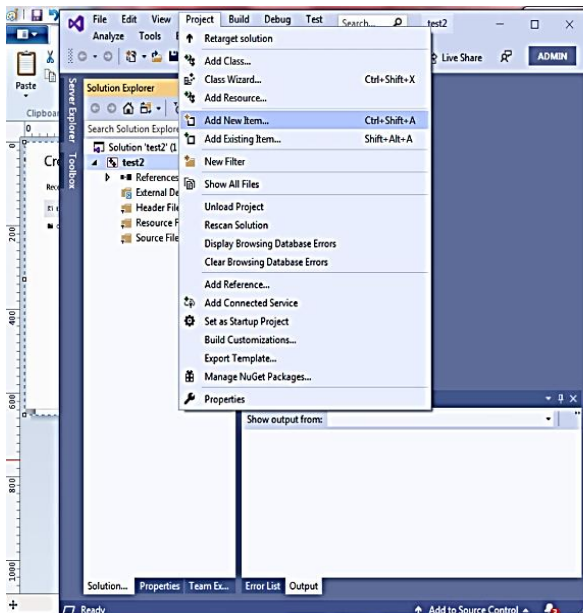

1. C:\opencv\build\x64\vc15\bin → copy the dll files
2. C:\Windows\System32 → paste

• Create a project

1. visual studio → create new project

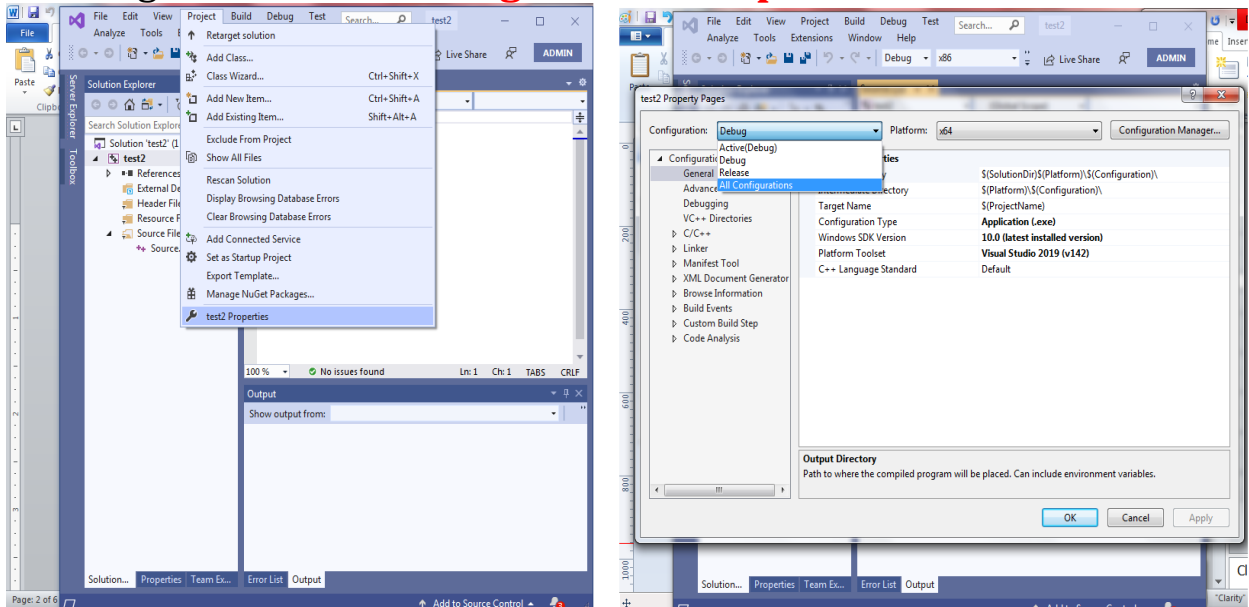

2. Add C++ file

• Add opencv files to your project

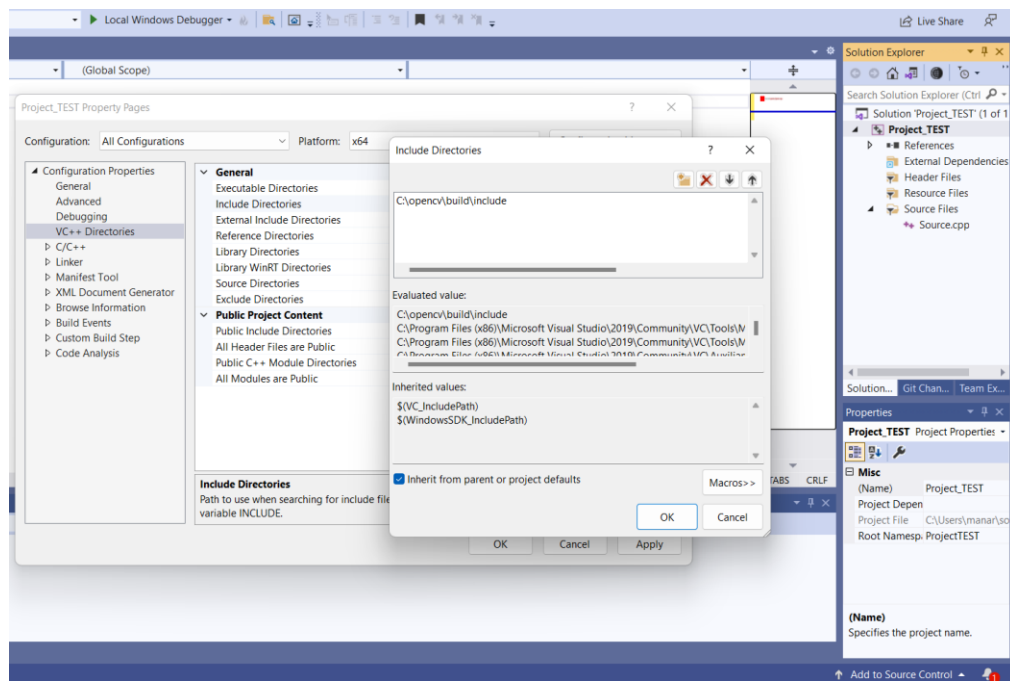

- Project → properties

1. Configuration → **all configuration** and **platform** → **x64**

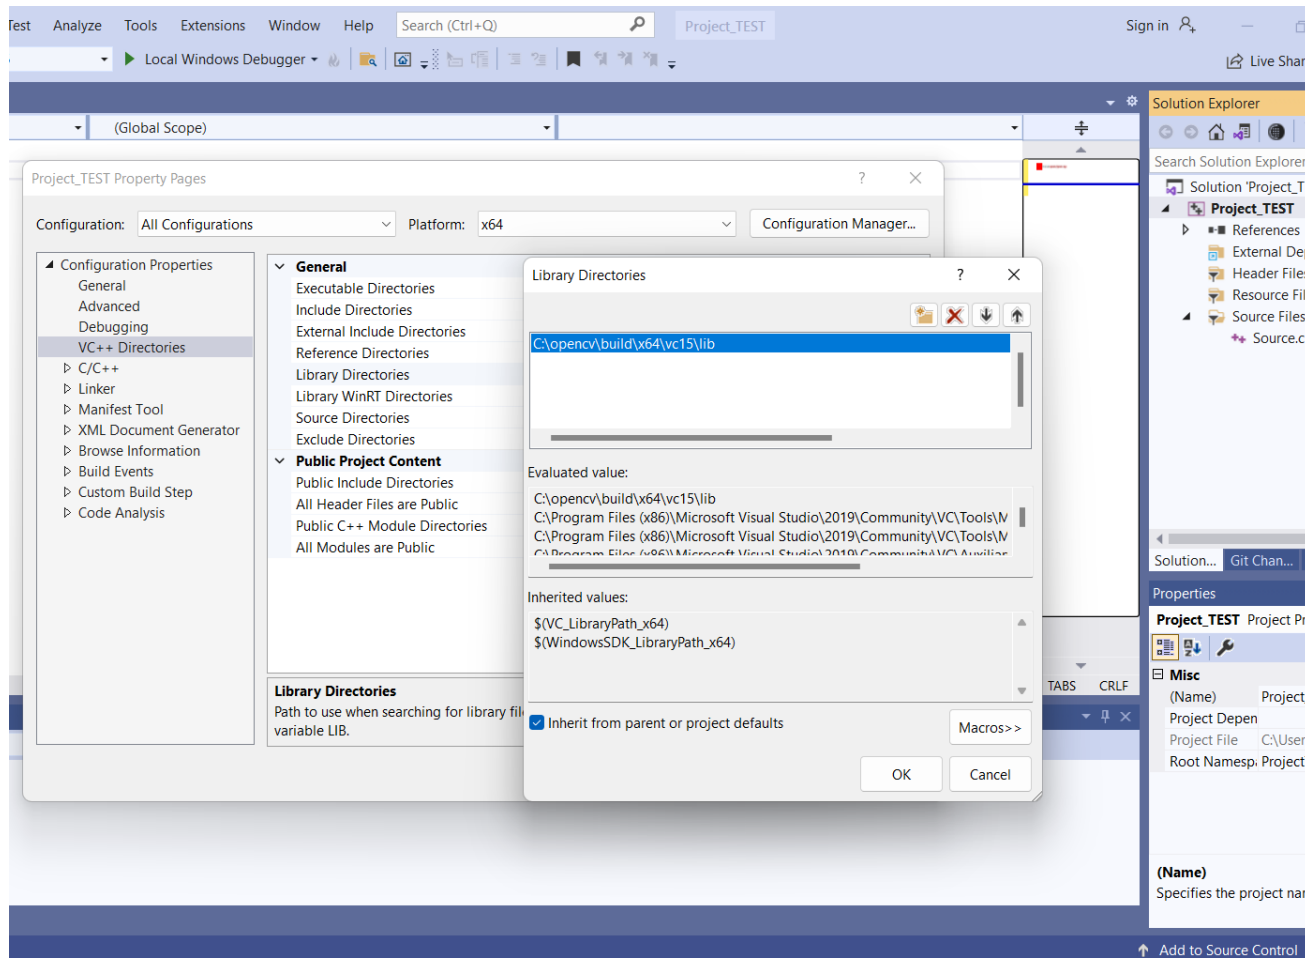

2. VC++ Directories

- Include directories → write the path of the include folder on your device. For example “C:\opencv\build\include”

Library directories → write the path of the lib folder on your device. for example “C:\opencv\build\x64\vc15\lib”

3. Configuration → Debug and platform → x64

Linker → input

Additional dependencies → write “opencv_world341d.lib”

4. Configuration → Release and platform → x64

Linker → input

Additional dependencies → write “opencv_world341.lib”
